

Une première application web

NodeJS / ExpressJS / whateverJS

```
import express from 'express'

const app = express()

app.get('/', function (req, res) {
  res.send('Hello World!')
})

app.listen(3000, function () {
  console.log('Example app listening on port 3000!')
})
```

```
app.get('/', function (req, res) {  
  res.send('Hello World!');  
});  
  
app.post('/', function (req, res) {  
  res.send('Got a POST request');  
});  
  
app.put('/user', function (req, res) {  
  res.send('Got a PUT request at /user');  
});  
  
app.delete('/user', function (req, res) {  
  res.send('Got a DELETE request at /user');  
});
```

Les middlewares

```
const logMiddleware = function (req, res, next) {  
  console.log('Start time:', Date.now());  
  next();  
  console.log('End time:', Date.now());  
}  
  
app.use(logMiddleware);
```

Les moteurs de templates

```
app.get("/", (req, res) => {  
  res.render("templateName", { pizzas: [{ name: "test" }, { name: "test2" }] });  
});
```

```
<% for(var i=0; i<pizzas.length; i++) { %>  
  <h2>  
    <%= pizzas[i].name %>  
  </h2>  
<% } %>
```

Organisation du code
